Mathematics Transformer

Function Transformation

* Mathematic Transformation: This type of transformation converts data PDF (Probablity Density function) in normal distribution.

Used in for algorithm require normal distribution for perform good.

eg- linear regression
logistic regression

Now in Sklearn there are 3 main transformer

- Function Transformer
  - log
  - reciprocal
  - Sq / Sqrt
  - Custom
- Power Transformer
  - Box-Cox
  - Yeo-Johnson
- Quantile transformer
