Machine learning Development Life cycle (MLDLC / MLDC)

Steps:

1) Frame the Problem
2) Gathering Data
   - web scrapping
   - Api
   - CSV
   - Database
3) Data preprocessing
   - remove duplicate/missing value
   - outlier
   - scale
4) Exploratory Data Analysis
   - Visualization
   - univariat/Bivariate
   - outlier detection
   - Inbalance → ~~balance~~ balance
5) Feature engineering and selection
6) Model Training, Evalution and selection
7) Model deployment
8) Testing
9) optimize
